

CLAIMS

I claim:

1. A game loader comprising:
 - a. a tarpaulin having first and second ends and having a preconfigured length and width, wherein said length is generally greater than said width;
 - b. at least one reinforcement strap substantially parallel to said length of said tarpaulin configured to provide reinforcement of said tarpaulin;
 - c. said first end having an attachment section configured to be attached to a stationary object; and
 - d. said second end having a second attachment section configured to be attached to a vehicle.
2. A game loader according to claim 1 further comprising at least one securing point for retaining loaded objects.
3. A game loader according to claim 1 further comprising a pocket operatively attached on said game loader for holding objects.
4. A method for loading game utilizing the game loader of claim 1 comprising:
 - a. attaching said first end of said tarpaulin to a stationary object using said attachment section;
 - b. attaching said second end of said tarpaulin to a vehicle using said second attachment section;
 - c. placing game or other object on said tarpaulin;

- d. moving said vehicle away from said stationary object such that tension is increased across the connection between the two formed by said tarpaulin;
- e. manipulating said game onto the rear of said vehicle; and
- 5 f. detaching said tarpaulin from said stationary object.
5. A method for covering and protecting a vehicle utilizing the game loader of claim 1 comprising substantially covering said vehicle with said tarpaulin.
6. A method for covering and protecting a vehicle according to claim 5 further comprising the step of attaching said second end of said tarpaulin to said
- 10 vehicle using said second attachment section to keep said tarpaulin in place.
7. A method for constructing a sleeping device utilizing the game loader of claim 1 comprising:
- a. attaching said first end of said tarpaulin to said stationary object using said attachment section;
- 15 b. attaching said second end of said tarpaulin to said vehicle using said second attachment section; and
- c. moving said vehicle such that the desired tautness of said tarpaulin is achieved.
8. A method for loading game utilizing the game loader of claim 2 comprising:
- 20 a. attaching said first end of said tarpaulin to a stationary object using said attachment section;
- b. attaching said second end of said tarpaulin to a vehicle using said second attachment section;

- c. placing game or other object on said tarpaulin;
 - d. moving said vehicle away from said stationary object such that tension is increased across the connection between the two formed by said tarpaulin;
 - 5 e. manipulating said game onto the rear of said vehicle; and
 - f. detaching said tarpaulin from said stationary object.
9. A method for covering and protecting a vehicle utilizing the game loader of claim 1 comprising substantially covering said vehicle with said tarpaulin.
10. A method for covering and protecting a vehicle according to claim 9 further
10 comprising the step of attaching said second end of said tarpaulin to said vehicle using said second attachment section to keep said tarpaulin in place.
11. A method for constructing a sleeping device utilizing the game loader of claim 2 comprising:
- 15 a. attaching said first end of said tarpaulin to said stationary object using said attachment section;
 - b. attaching said second end of said tarpaulin to said vehicle using said second attachment section; and
 - c. moving said vehicle such that the desired tautness of said tarpaulin is achieved.
